Prices are F.O.B. mill, excluding freight

Commodity markets had a much different tone than in prior weeks. Traders sensed a market top and began planning for a correction, especially in DF dimension and studs. SYP was more stable as improved weather was more suitable for building spread across Texas and the South. SPF dimension slowed in activity and counters were available in both eastern and western species. OSB remains tight and firm priced in the West, but began to show some vulnerability in the SE market.
