"Liberation Day" saw Canada and Mexico left untouched in Mr. Trump's long list of new tariffs. This is good news for builders and buyers - lets hope it lasts. For the moment, mills are showing more wood available for sale. Demand remains to the lean side, so we will see how this newly liberated wood gets absorbed into the markets. Lumber futures took a hard drop down today as the threat of additional costs on lumber dissipated. The sluggish pace of OSB sales in prior weeks continued, and now the Canadians have more product to move. We are definitely in for a reset of the markets in the coming weeks. Stay tuned as we all know that it's a somewhat fluid situation. Baseball is back, the Masters is just around the corner, and the hum of motorcycles is in the air. Just don't look at your 201(k) anytime soon.
